

# A WEDDING NIGHT GIFT SURE TO DELIGHT

**T**he wedding night. It's your first night together as a married couple, and one you'll never forget. Once you slip away from the crowd, leaving the noise of the party behind, you can focus on sharing a tender moment with your new spouse.

The only thing that could make it better? A sexy surprise.

Photographer Kate Hood of khi Photography knows exactly what will get your partner's heart racing on your wedding night: boudoir photographs.

"When someone surprises their partner with sexy photographs, it gets an amazing reception," says Hood. "People don't expect it and they love knowing their new spouse has done this just for them."

Having been in the industry since 2008, Hood has a fresh perspective on what modern couples want. Offering engagement, wedding, boutique boudoir and family photography, khi Photography always makes sure the client's personality is shining through.

While taking sexy photographs might sound daunting, Hood is sure to set her client's mind at ease – working with each individual's comfort level.

"The boudoir sessions are very private," Hood stresses. "It's just me and the client in the space together. We talk about how they want the pictures to turn out, what their partner will like and any insecurities they might have. People move past their body issues when they realize what beautiful photographs they can create."

Hood always keeps it professional and lighthearted.

"Women usually start off shy, but we have lots of fun giggling, talking about our

weddings and making silly jokes," she says. "We always have a lot of fun."

Hood can then create DVDs, custom-designed albums or canvas prints for that special finishing touch.

As the only photographer in Muskoka to take on boutique boudoir photography the way she has, Hood has built a reputation as a trusted professional. She and her husband – who work side-by-side when she's not shooting in the boudoir – have a dramatic collection of photojournalistic, black and

white and modern shots in their portfolio.

khi offers photography packages for couples-to-be that are customizable depending on preference. Hood also holds boudoir marathons in luxurious Toronto hotels, with the next marathon scheduled for Jan. 21 and 22. Couples and in-home Muskoka sessions are also available. "The pictures you took of my new wife are absolutely beautiful. You really did an amazing job at capturing her beauty. I have thoroughly enjoyed my wedding gift from her! You really do wonderful work."

*Paul B., groom*

"I just wanted to say another huge, huge thank you for Saturday. I never could imagine that it would have been as fun and comfortable as you made it. It's not every day that a stranger can make someone in their undies feel comfortable, especially in front of a camera! Thank you for being so incredibly fun, professional and showing me some of the shots. Also for spending the extra time and getting in those last few incredible pictures with the flash! I can't wait to see them all and have you put together an album for my fiancé."

*Stacy C., boudoir client and bride*
